<i>Haim Dasberg</i> How Psychotherapists Cope With Their Patients' Trauma	31
<i>J. Lanser</i> The Second Generation: Dutch Examinations and Professional Care	46

Preface

This second issue of *Echoes of the Holocaust* is dedicated to the memory of Professor Heinrich Zvi Winnik, who was one of the Israeli pioneers of research in the field of the psychological effects of the Nazi persecution.

The appearance of the second issue coincides with commemoration of the Warsaw Ghetto Uprising. Fifty years have passed since then, and very few survivors of this heroic act are still alive to tell us about the demise of Jewish existence in Poland, and of the Uprising.

The studies presented here indicate the vivid and increasing interest in the Holocaust and its after-effects.

Shalom Robinson
